EXECUTIVE SUMMARY

Azure Cloud & DevOps Architect with 13+ years of experience in designing, deploying, and managing enterprise-scale Azure Data Analytics platforms. Proven expertise in Azure infrastructure, DevOps automation, cloud security, and CI/CD pipelines. Skilled in Terraform, ARM templates, and Kubernetes, with a strong focus on cloud migrations, containerization, and infrastructure as code (IaC). Adept at leading teams, optimizing cloud solutions, and implementing secure on-prem-to-cloud connectivity. Experienced in securing cloud deployments and implementing code scanning and vulnerability assessment. Passionate about mentoring, competency building, and driving cloud transformation strategies for large-scale organizations.

SKILLS

AZURE

Azure Private Endpoints, Azure RBAC, Azure IAM , Azure Databricks , Azure Synapse Analytics , Azure Data Factory, Azure Compute Workloads, Azure FrontDoor, Azure APIM, Azure Keyvault , , Storage / ADLS , Azure SSO

DEVOPS

Azure DevOps, GitHub , , Docker / Kubernetes, WhiteSource, SonarQube, Ansible, Checkov

INFRASTRUCTURE AS CODE

Azure Resource Management Template, Azure Biceps , Terraform

AWS

AWS EC2, S3, Route 53-DNS, CloudFront, ELB, Auto Scaling, Elastic Beanstalk

DATABASE

MSSQL, Azure SQL, Azure CosmosDB, AWS RDS

SCRIPTING

PowerShell, Shell/bash, Python

OPERATING SYSTEMS

Windows Server 2008/2008R2/2012, Linux Server- Ubuntu / Redhat(6-7)

PROFESSIONAL EXPERIENCE

EY GLOBAL DELIVERY SERVICES

Feb 2018 - Till now

Role: Azure DevOps Architect, Cloud Platform Architect, Cloud Platform & DevOps Manager

Cloud Platform Architect

At EY Global Delivery Services, I have been working as an Azure DevOps Architect and Cloud Platform Architect since February 2018. My primary focus has been on designing, deploying, and managing Azure-based Data Analytics Platforms while implementing DevOps best practices for automation and scalability.

- Designed and deployed secure, scalable Azure Data Analytics Platforms for multiple clients using Terraform, ARM templates, and Azure DevOps.
- Implemented Azure Cloud Security Best practices based on landing Zone such as Vnet Injection, Azure Private Endpoint and Secure networking.
- Architected and implemented Azure infrastructure for Data Analytics solutions, including Synapse Analytics, Databricks, Data Factory, and ADLS.
- Led Azure Cloud Migration and containerization strategies, optimizing cost and performance.
- Configured CI/CD pipelines for applications, ensuring seamless integration and continuous delivery.
- Implemented code scanning and vulnerability assessment tools to enhance application security and compliance.
- Developed end-to-end DevOps pipelines integrating Databricks, Data Factory, and Synapse Analytics, incorporating branching strategies, automated testing, and deployments for DNA Projects.
- Implemented CI/CD pipelines with quality gates, vulnerability scanning, and automated deployments.
- Designed secure networking and identity management solutions, ensuring compliance with enterprise security standards.
- Established secure on-prem-to-cloud connectivity and governed access control policies.
- Led a team of 10 engineers, managed project resourcing, and actively contributed to RFPs and RFIs for cloud-based solutions.
- Spearheaded internal capability-building initiatives, conducting training sessions and mentoring teams in Azure and DevOps.

GOOD METHODS GLOBAL(CARESTACK)

June 2016 -Feb

2018

CARESTACK DENTAL PMS

Cloud Deployment Engineer

CareStack Dental Practice Management System by Good Methods Global is a Cloud based system, being used by US based Dental Practices. Migrated full AWS stack to Azure and have set up Application build and deployment pipeline using TeamCity, Azure DevOps, and SonarQube. Translated full Application Deployment platform to ARM templates and automated end to end provisioning of any new environment.

- Migrated full AWS infrastructure to Azure.
- Set up application build and deployment pipelines using TeamCity, Azure DevOps, and Octopus Deploy.
- Configured static code analysis tools and quality gates in SonarQube to ensure code quality and adherence to coding standards.
- Translated entire application deployment platform to ARM templates for automated provisioning.
- Automated environment provisioning for solution stacks.
- Standardized application deployment processes.
- Implemented performance monitoring via NewRelic and Azure Insights.
- Developed Azure Automation solutions for cost management.
- Integrated database schema version control with CI/CD.

MINDCURV

Feb 2016 -2016

June

LEADING GLOBAL DIRECT SELLER OF PREMIUM HOUSEHOLD APPLIANCES.

Infrastructure Specialist Level 2

CICD set up for Application & Infrastructure deployment to AWS for multiple projects

- Managed AWS resources including EC2, ELB, Auto Scaling, S3, and Route 53 DNS.
- Managed AWS deployments (relevant for hybrid cloud environments).
- Set up CI/CD pipelines for application and infrastructure deployment.
- Deployment and troubleshooting of containerized applications.
- Deployed Hybris applications via Jenkins.
- Configured clustered Elasticsearch nodes for Hybris.

ACCENTURE SERVICE PVT LTD. HYDERABAD
2016

Jun 2011 – Feb

AWS PLATFORM ENGINEER FOR GLOBAL PHARMA FIRM
Software Engineer

The objective of this project was to manage more than 500 websites built using our custom platform. The platform/applications were hosted in multiple AWS EC2 regions. A total of 30 AWS EC2 Linux(Ubuntu) were used to host the application.

- Created and maintained AWS infrastructure (EC2, ELB, Auto Scaling, S3, Route 53).
- Implemented CI/CD with Jenkins and AWS OpsWorks.
- Utilized Amazon CloudFormation for infrastructure provisioning.
- Monitored applications using AWS CloudWatch, NewRelic, and CopperEgg.
- Administered Tridion CMS for enterprise websites.

AWS PLATFORM ENGINEER FOR CMS MIGRATION
Assistant Software Engineer

The project is related to migration of hundreds of websites to Tridion CMS. My role is to provide support in areas of environment set-up and management on Amazon Cloud.

- Conducted administrative and maintenance tasks for Tridion CMS.
- Managed database and application migration to AWS cloud.

EDUCATION

ST.JOSEPH'S COLLEGE OF ENGINEERING & TECHNOLOGY, PALAI

Jun 2007 – May 2011

B.Tech in Computer Science : 68.33 %
